Skills and Summary

- o Software enthusiast with experience in object-oriented programming and developing for software and operations teams in agile and start-up environments.
- o Strong self-learner with strong analytical, critical thinking, debugging skills and avidity for expansion of current skillset.
- o Capable of leading a team with multiple tasks at hand, ranging from software to hardware.

Programming Languages: C#, Java, C/C++, Python, JavaScript, PHP, VHDL, MATLAB

Framework/Libraries: p5.js, Bootstrap, jQuery, .NET

Tools: Visual Studio, Visual Studio Team Services, Distributed Revision Control System(Git)

Experience

Embedded Software Developer, Crypto TRX Products Inc

Example 2018 - Present

- o Work with the hardware and firmware of the product by using computer-aided design software like **VHDL**, operating system software, and circuit testing.
- o Use C++, Java, PHP to maintain the interface of the product. Work with technologies such as IBM Enterprise Blockchain Solutions, digital and electronic systems to develop the product.

Research Assistant, Ryerson University

iii May 2018 - Present

- o Configurated a Multiple-Kinect V2 tracking environment in C# by acquiring the joint skeleton data from four Kinects using Microsoft Kinect SDK 2.0.
- o Used TCP/IP protocols and client-server network to send the joint data from multiple clients to a single server.
- o Worked with a graduate student to implement a Kinect fusion algorithm to merge the multiple Kinect joint data on the server computer to create a single 360° Kinect skeleton.

Webmaster, IEEE Ryerson Electronics Chapter

May 2018 - Present

- o Used **HTML**, **CSS**, **JavaScript** and to update and improve the IEEE Ryerson's Electronics Chapter's website (https://www.ee.ryerson.ca/~rec/).
- o Acquired front-end web developer skills by maintaining the user interface and the style of the website.

Engineering Projects

IEEE E-Bot Certificate Workshop

o Built a dual wheel autonomous E-Bot that is controlled using **Arduino**, **accelerometer**, and various sensors. Used tools such as **package.json** and platforms like **IBM Watson** to communicate and monitor data.

IEEE IoT Smart City Hackathon (3rd Place)

o Built an automatic street lights system with crash detection ability using **IBM's Cloud Servers**, **HUZZAH ESP8266**, **ultrasonic** and **sound sensors**.

Human Handwriting Imitator

o Created software in **C#** which once synchronized imitates the user's handwriting so that very time a key is pressed on the keyboard that letter, number, or symbol appears in the user's handwriting.

■ Achievements

- o Received Undergraduate Student Research Award (USRA) sponsored by the Natural Sciences and Engineering Research Council of Canada (NSERC).
- o Received a letter of congratulatory from the Prime Minister, Minister of Innovation and from the President of the Canadian Space Agency for placing 2nd worldwide in the NASA Space Ames Contest.

S Education

CGPA: 3.47/4.33
