Rinay Shah 117 Seahorse Ave BRAMPTON ON L6V4N5 CANADA

Rinay Shah:

The Natural Sciences and Engineering Research Council (NSERC) is pleased to offer you an Undergraduate Student Research Award (USRA). The program aims to stimulate your interest in research in the natural sciences and engineering and to encourage you to undertake graduate studies and pursue a research career in these fields.

NSERC offers a USRA to candidates on the basis of their academic record and research aptitudes.

As an award winner, you may be eligible to apply for a travel allowance and/or supplementary funding. You are encouraged to consult the <u>Undergraduate Programs</u> page as well as the <u>Undergraduate Student Research Awards</u> for details.

This federal support for research is an investment by the people of Canada. By demonstrating the social, economic and cultural value of their natural sciences and engineering research, NSERC award recipients help strengthen public understanding of and support for NSERC-funded research. If you accept the award, you are encouraged to review the guidelines for acknowledging NSERC support.

Review the Terms and Conditions of Award carefully as they contain important information about your award. Retain this letter for future reference.

Congratulations on your achievement.
